

KIWI TOOLING

Suppliers of high performance tooling board

KT/P720 POLYURETHANE TOOLING BOARD

Chosen as a cost effective, low dust producing stable medium to directly compete with any available PU boards on the NZ market. KT-P70 is formulated to form small chips rather than dust, for protection of machines and a cleaner safer working environment.

Applications:

- Moulds & Master models
- Prototype foundry patterns
- Prototype vacuum forming
- Die Models

P70	
Colour	Light Brown
Hardness @ 75°F	60 - 65 Shore D
Nominal density, g/cm ³ (kg/m ³)	0.72 (720)
Deflection Temperature	75 - 80°C
Coefficient of Thermal Expansion	50 - 55 x 10 ⁻⁶
Flexural strength , MPa	25 - 30
Compressive strength, MPa	20 - 25

Sheet Size: 1500x500

Thicknesses: 30mm, 50mm, 75mm, 100mm
